

EPLAN

with many AGRO cable glands.

Efficient engineering is,
when a PLAN becomes EPLAN.

AGRO cable glands now available in EPLAN Data Portal.

Expansion of the digital planning portfolio! This is what you can expect from us.

Complete package of services from AGRO AG

Every AGRO cable gland is connected to a complete service package. Some of them - such as professional advice on site - are immediately noticeable, others run in the background and simply express themselves in the fact that the right product arrives at the desired time. In our in-house certified test laboratory, we ensure that you receive products of consistent top quality from us.

Addition to the service portfolio

In addition to our service portfolio, many AGRO cable glands are now available in the EPLAN Data Portal.

What data is available?

In addition to technical properties/data, 2D and 3D drawings as well as drilling templates for many industrial products are available. They are quickly and easily obtainable. The data can be easily integrated into CAD programs for switch cabinets.

Further products will be added step by step.

Use of EPLAN Data Portal. The advantages at a glance.

EPLAN at a glance

EPLAN offers software and services for all aspects of engineering in the areas electrical engineering, automation and mechatronics. The company develops one of the world's leading software solutions for machine, plant and switch cabinet construction.

- Integrated, web-based data platform for plant and switch cabinet construction
- Direct worldwide online access
- Can be used without formatting effort
- Leads to quality increase, time saving and efficiency increase
- Current device data from market-leading component manufacturers (>150 manufacturers, > 660,000 data records)
- Direct benefit in project planning with EPLAN software solutions

EPLAN Data Portal

Integrated, web-based data platform for providing contemporary device data from market-leading component manufacturers for direct use in project planning with EPLAN software solutions.

EPLAN Software & Service

EPLAN is also the ideal partner for simplifying challenging engineering processes. Standardized and individual ERP and PLM/PDM interfaces ensure consistent data along the entire value chain. Working with EPLAN means unlimited communication across all engineering disciplines. Whether small or large companies: customers are enabled to use their expertise more efficiently. EPLAN wants to continue growing with customers and partners and is driving integration and automation in engineering forward.

Over 51,000 customers are supported worldwide. "Efficient Engineering" is the motto.

Video EPLAN

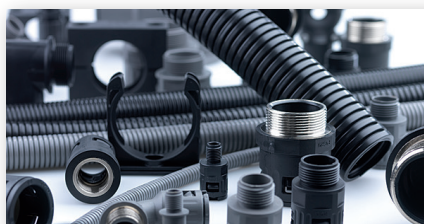

Systems and solutions for professional electrical installations and industry.

Cable glands.

Progress® and Syntec® cable glands. For cables, the best.

Protective cable conduits.

Products for applications the construction of machines and systems, as well as the design of road and railway vehicles, automation and power engineering.

Cable inlets.

Modular cable and conduit inlets.
Liquid tight and gas tight.

BIM Building Information Modeling.

First build digitally, then in reality.

Electrical installation.

Systems and solutions for professional electrical installation work with flush-mounting/masonry/cavity wall and concrete constructions.
